Why do I need Iron Removal?

Red or brown stains on your fixtures? Metallic taste to the water? Rusty water running from your tap? Diamond H2O® has your solution. The Patented Liberator Iron Removal filter will give you years of iron-free water. Not only will this filter remove the iron that has been plugging your pipes and staining your fixtures, but it will do so without any chemicals. With our patented design, the Liberator IR™ adds air as needed to oxidize your incoming iron. The iron then travels to the filter bed to be easily removed, resulting in clear, iron-free water!

Liberator IR Design

- Residential Point of Entry (POE) iron removal
- Oxidizing tank introduces air to iron molecules transforming them into a filterable state
- Media mixture that aids in reducing iron and manganese
- Patented design allows the Liberator IR system to be programmed according to your individual needs

The Diamond Difference

Investing in Diamond H2O® water treatment equipment will provide you with not only solid, high quality products but also a company that takes pride in providing expert, unmatched service. For over 80 years the Diamond H2O® team has been providing enhanced water solutions to it's customers, and will continue to be on the cutting edge of developing technologies while upholding a strong, committed family-oriented business model. We welcome you, and we are here to help.
