Your water never had it so good.

microline®

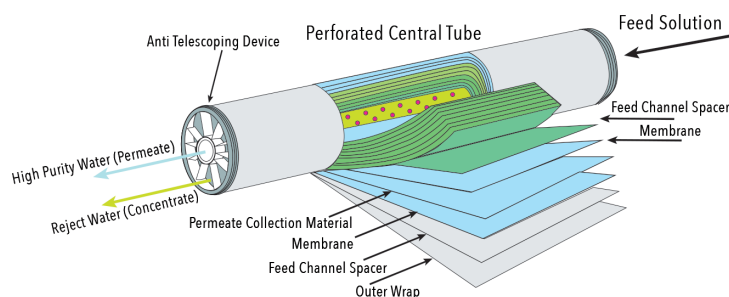

Benefits of Reverse Osmosis

Using system water pressure, the semi-permeable membrane allows the water to pass through it while preventing the passage of contaminants. Pollutants are flushed away, not collected, while consuming no energy.

Reverse osmosis water is better quality than most kinds of bottled water. Along with this, the lower cost and absence of plastic bottles means you save money and are good to the environment. Cooking and making drinks, coffee, etc. with RO water makes everything taste better too!

Spiral-Wound Membrane Element

The Diamond Difference

Investing in Diamond H2O® water treatment equipment will provide you with not only solid, high quality products but also a company that takes pride in providing expert, unmatched service. For over 80 years the Diamond H2O® team has been providing enhanced water solutions to it's customers, and will continue to be on the cutting edge of developing technologies while upholding a strong, committed family-oriented business model. We welcome you, and we are here to help.

Diamond H2O is a long standing member of these fine organizations:
